How to configure Pc Prox Plus to read Mifare Classic

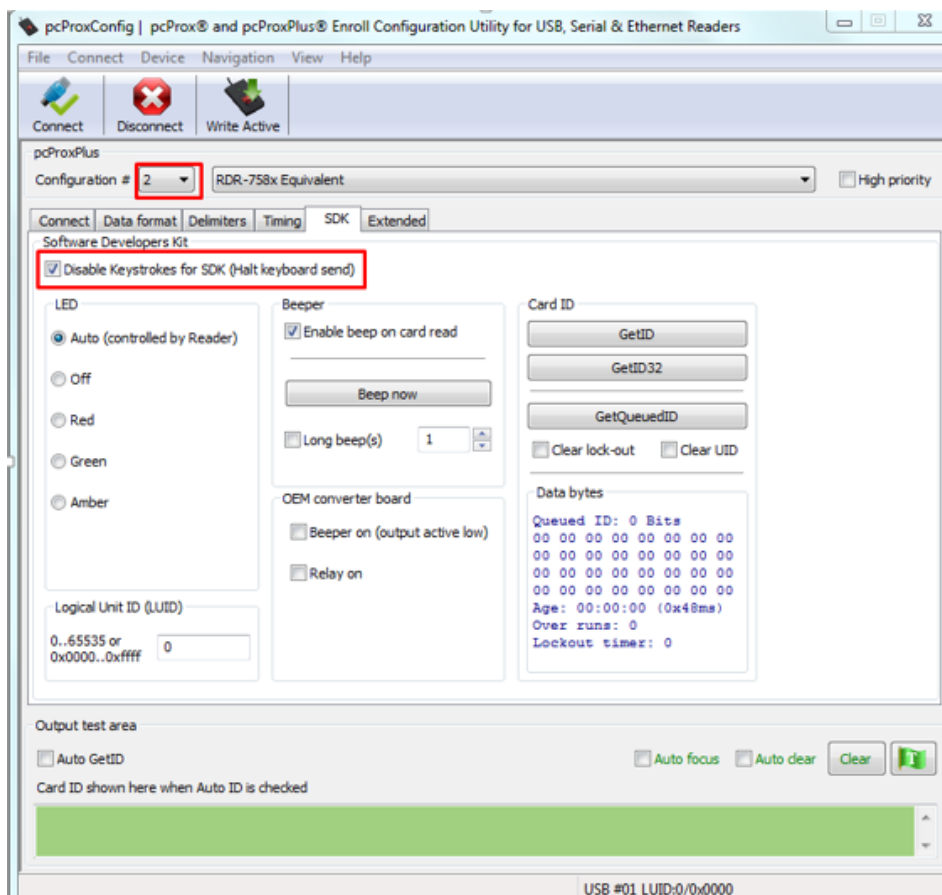

Please download PcProxConfig.exe application from the manufacturer's website here.

After that disable keystrokes keyboards.

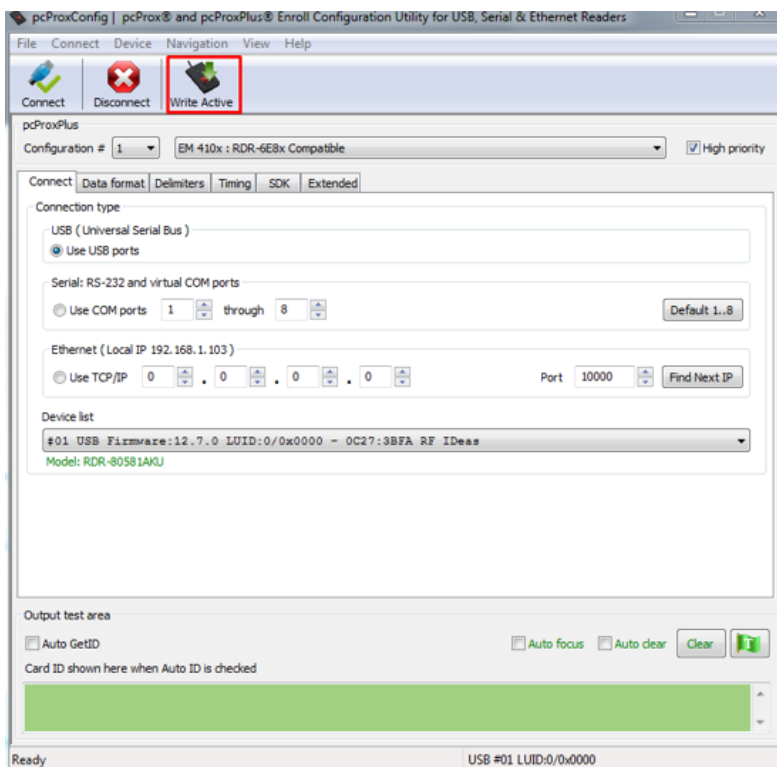

Select #1, SDK tab and mark the option **Disable Keystrokes for SDK**.

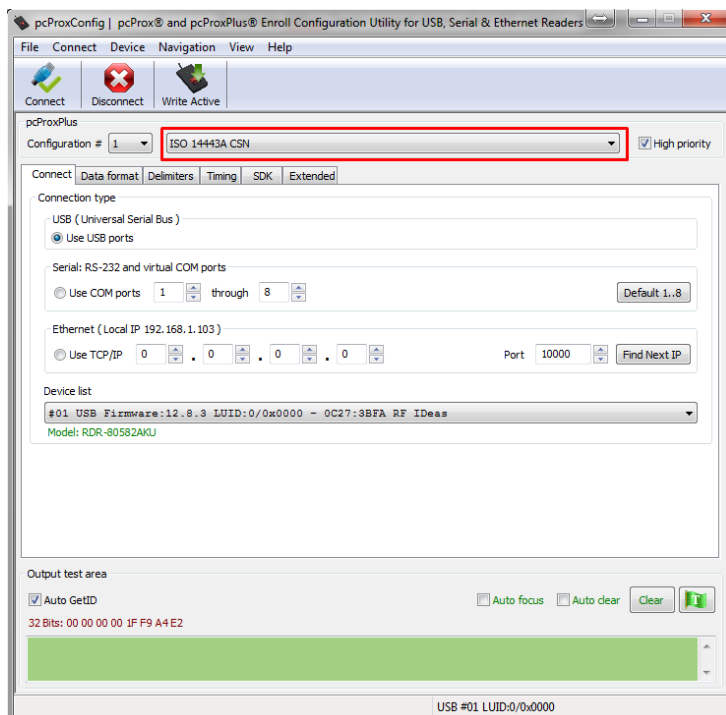

Select #2, SDK tab and mark the option **Disable Keystrokes for SDK**.

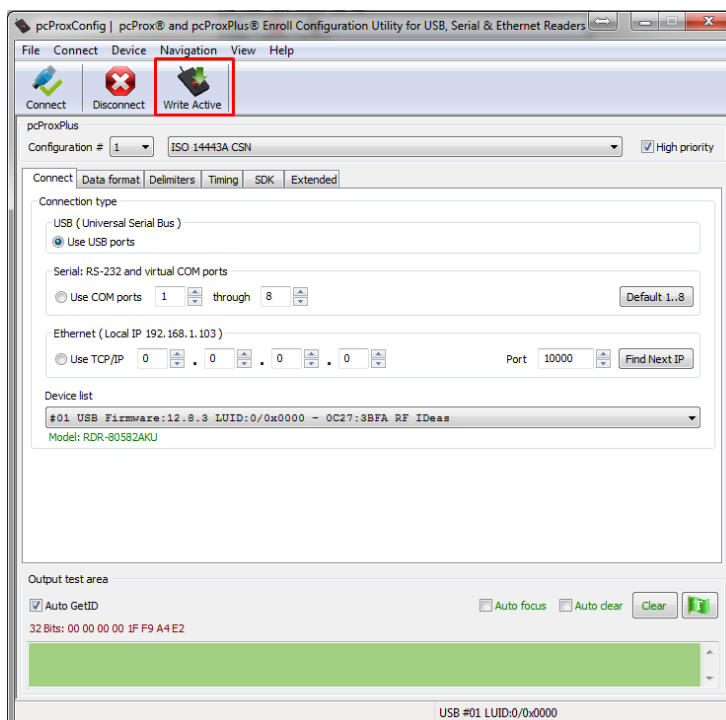

After that click **Write Active**.

To activate Mifare Classic support please select ISO 14443A CSN option.

After that click Write Active.

The encoder is now configured to read UID from Mifare Classic cards.
